Exceptional quality and simple scalability, all in one colour laser printer range

Through 5 years of significant investment and enhancements in research and development, we bring to you a premium A4 colour laser range. This range builds upon our existing award-winning SMB portfolio, offering a line up that has been designed and engineered to meet the needs of enterprise business.

Our latest colour laser range is designed to deliver the professional performance your business needs – with high-speed, glossy colour printing you can rely on, professional grade security features as standard and the flexibility to tailor your device to suit you and your business.

Solutions enabled

Print management solutions are at the heart of every model – enabling you to automate workflows and improve efficiency and security. You have the option to upgrade your device with intelligent Brother and third-party solutions, including integration with industry leading providers PaperCut and YSoft. This gives you complete flexibility in how you manage, secure and control your documents.

Premium colour

Our most advanced colour printing technology is guaranteed to make the right impression when it counts, with vibrant, professional colour prints and accurate digital capture using advanced image processing. The highly efficient fuser unit works seamlessly with the next generation toners. Producing a premium, glossy finish with high colour density to each document, every time.

PaperCut  YSOFT

Secure by design

As working conditions change, security is more critical than ever. That's why each single function printer and all-in-one multifunction device come equipped with a range of features that deliver enterprise level security.

To safeguard data against loss or theft, Transport Layer Security (TLS), Secure Socket Layer (SSL), IPsec and Scan to SSH Server (SFTP) are supported so that your most confidential files transfer using up to 256-bit encryption during transmission over the network. Using automatic intrusion detection, devices recognise abnormal activity and take preventative measures in order to ensure the device remains secure.

In addition, identity management and access controls help to reduce risk with selective user restriction, only allowing authorised employees or groups to get instant access to specific settings and functions they need.

Engineered for performance

The robust design, upgraded memory and long-life components provides confidence your device keeps on performing without interruption.

With fastest in class 2-sided scanning speeds of up to 100 ipm, physical documents are easily transformed into digital files with precision clarity.

Twin laser technology enables productivity to be greatly improved. With a first print out time of less than 10 seconds and a duplex print speed of up to 40 pages per minute, you are never kept waiting for that important document.

Managed Print Services (MPS) enable you to get the best out of your devices. That's why each printer has been designed with MPS in mind.

MPS helps to save you money, with flexible payment options and lower ongoing running costs. You'll also get more control with real-time reporting tools and higher efficiency as workflows are streamlined and easily scalable. The real-time data also enables you to monitor your environmental impact, helping your business to meet its sustainability goals. Plus, automated benefits such as monitoring print behaviour and toner replenishments help to optimise your print experience, while innovative security protects against any threats you may face. And it's all really simple – once set up, you can sit back and let it do the heavy lifting for you.

Accessories

Flexibility that saves you time

Businesses are constantly evolving to stay ahead. Our colour laser printer range allows you to easily adapt as your business grows – adding productivity boosting features for optimal performance. Whether you need a mailbox to sort your printed documents or a staple finisher to automatically staple your documents, your printer can be easily transformed to help improve business productivity. The paper tray configurations available for all models offers practical functionality for your day-to-day printing needs, saving you time and money without needing to invest in multiple devices.

Our world class toner remanufacturing programme helps to reduce waste extending our product lifecycle and reducing environmental impacts.

Dedicated to remanufacturing and reducing CO²

We're regularly investing in more sustainable products by working towards the circular economy principles of reduce, reuse, refurbish, repair and recycle.

Dedicated remanufacturing facilities support our toner cartridge return and recycle scheme. Each remanufactured toner cartridge saves on average 2.05kg CO². Globally, last year, we remanufactured 2.59 million cartridges achieving a reduction of 5,300 tonnes CO². With this, not only is diversion from landfill assured, but your Company's carbon footprint is reduced.

COOL EARTH

To complement the toner remanufacturing program, we have been partners with rainforest charity Cool Earth, for over a decade. Together we back local people to protect rainforest from deforestation. So far working with our customers, Brother and Cool Earth, support seven communities in the rainforests of Papua New Guinea and the Peruvian Amazon that are custodians of over 70,000 hectares of rainforest, over 23,000,000 trees and over 37 million tonnes of carbon stores.
